The Latency of Online Conversion in the Consumer Electronics Industry

More Search, More clicks, More time.

Google/Compete
U.S., July 2009

Key Takeaways

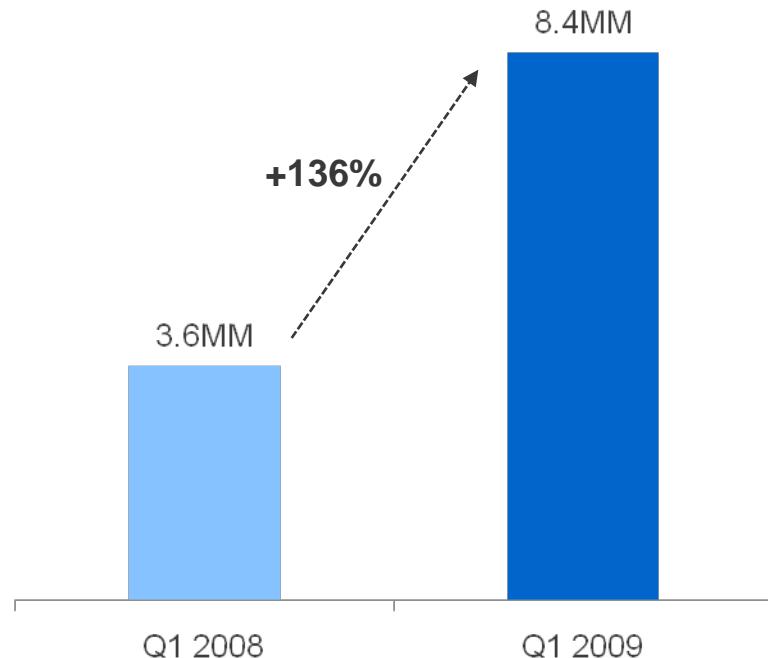

- Search-driven conversion rates are up in 2009
- Consumers are doing more research, making more clicks between first click and purchase
- Conversion rate measurement window must be extended to reflect increased consumer research

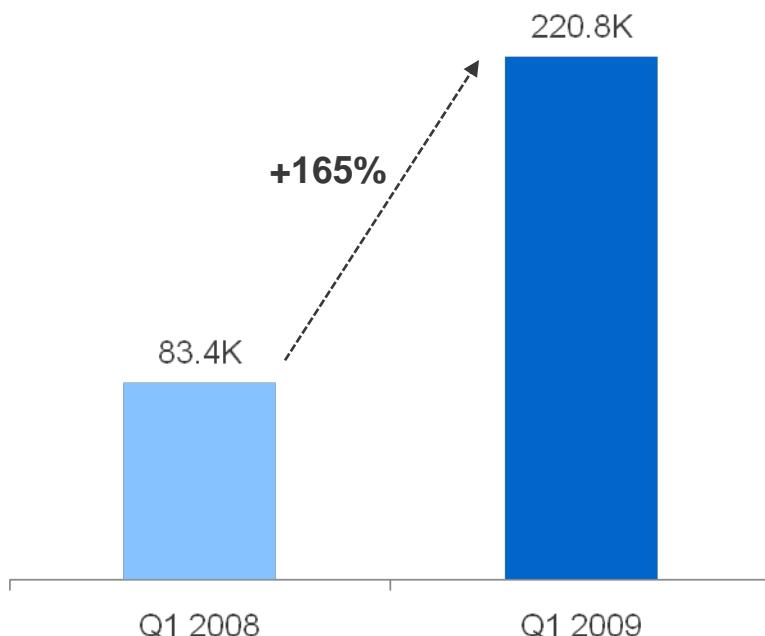

Search Drives Site Visits and Conversions

Consumer Electronics

Search-Driven Referrals

Search-Driven Share of Retail Conversions

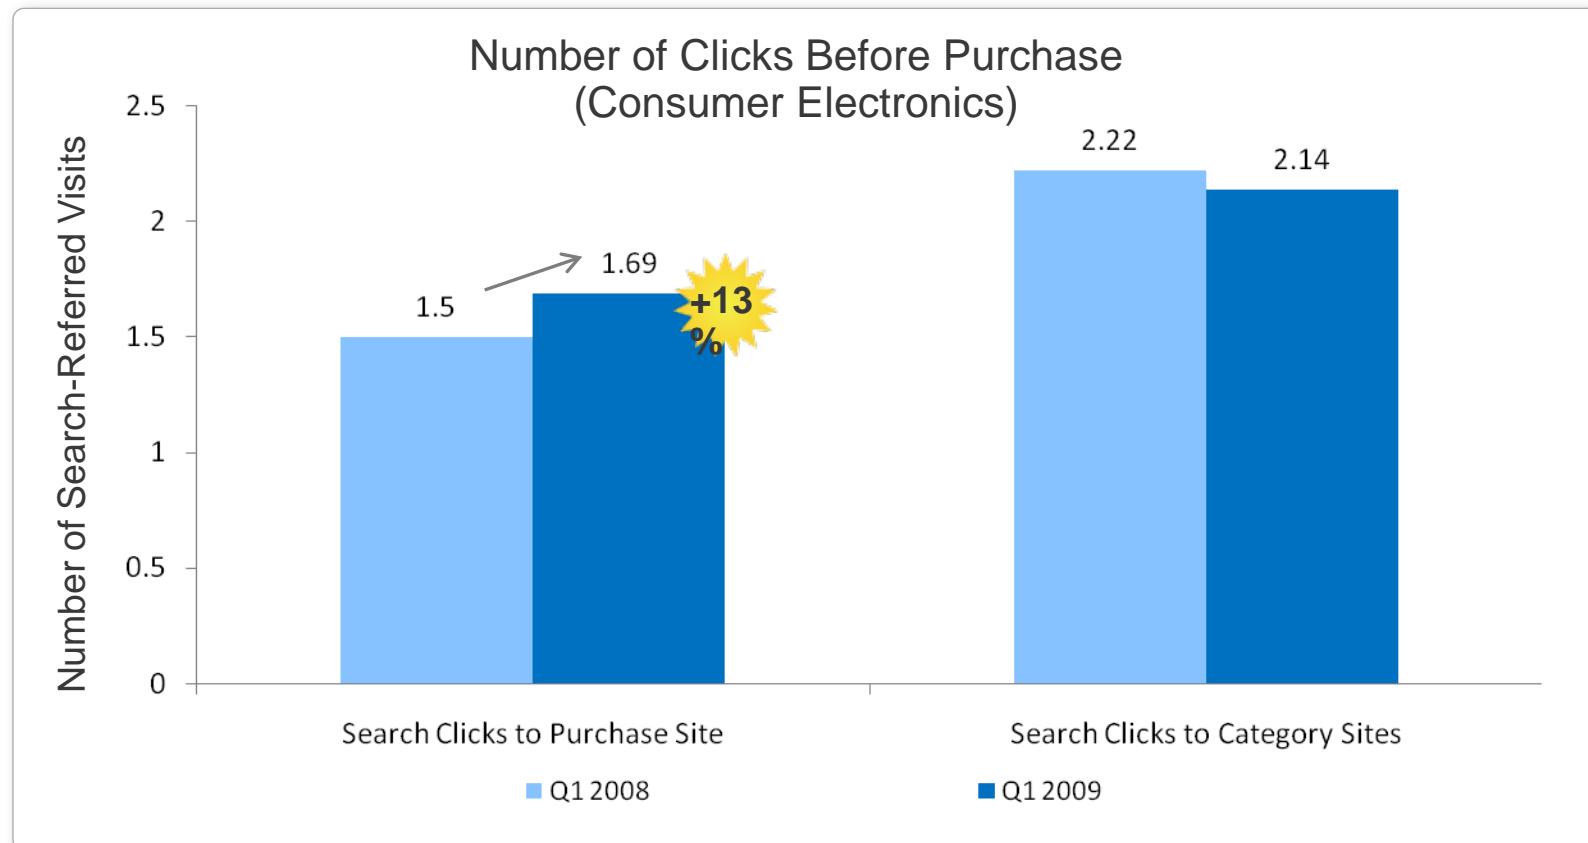

Search Increasingly Sends Shoppers to Consumer Electronics Sites

Searchers Increasingly Convert

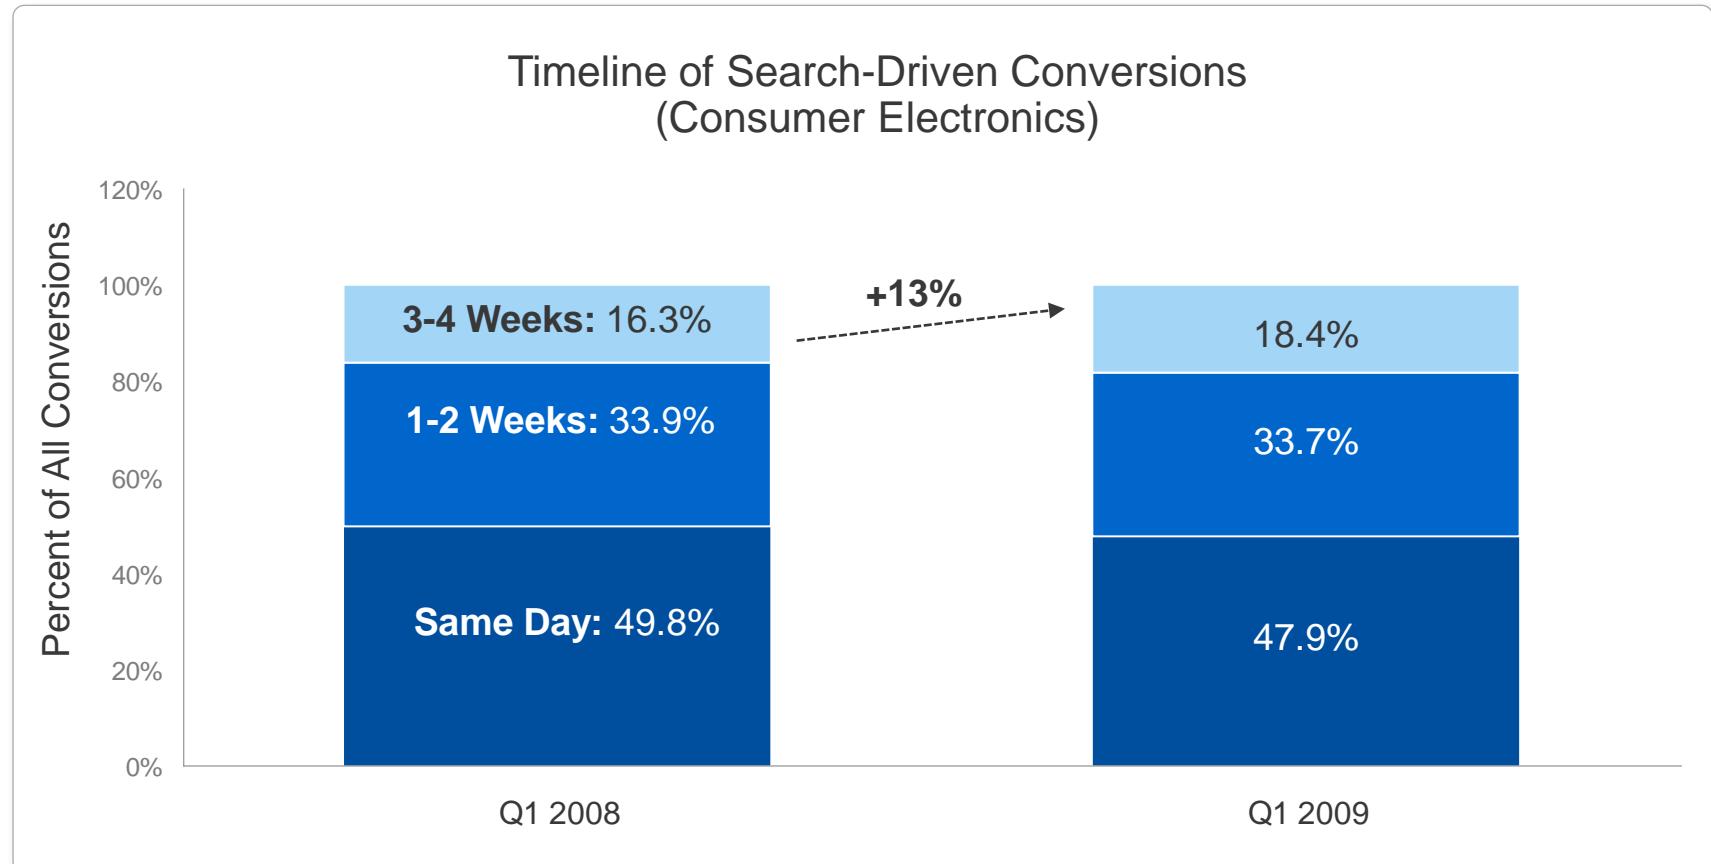

But Shoppers Now Click More

Consumers are doing more research, visiting more sites before purchasing.

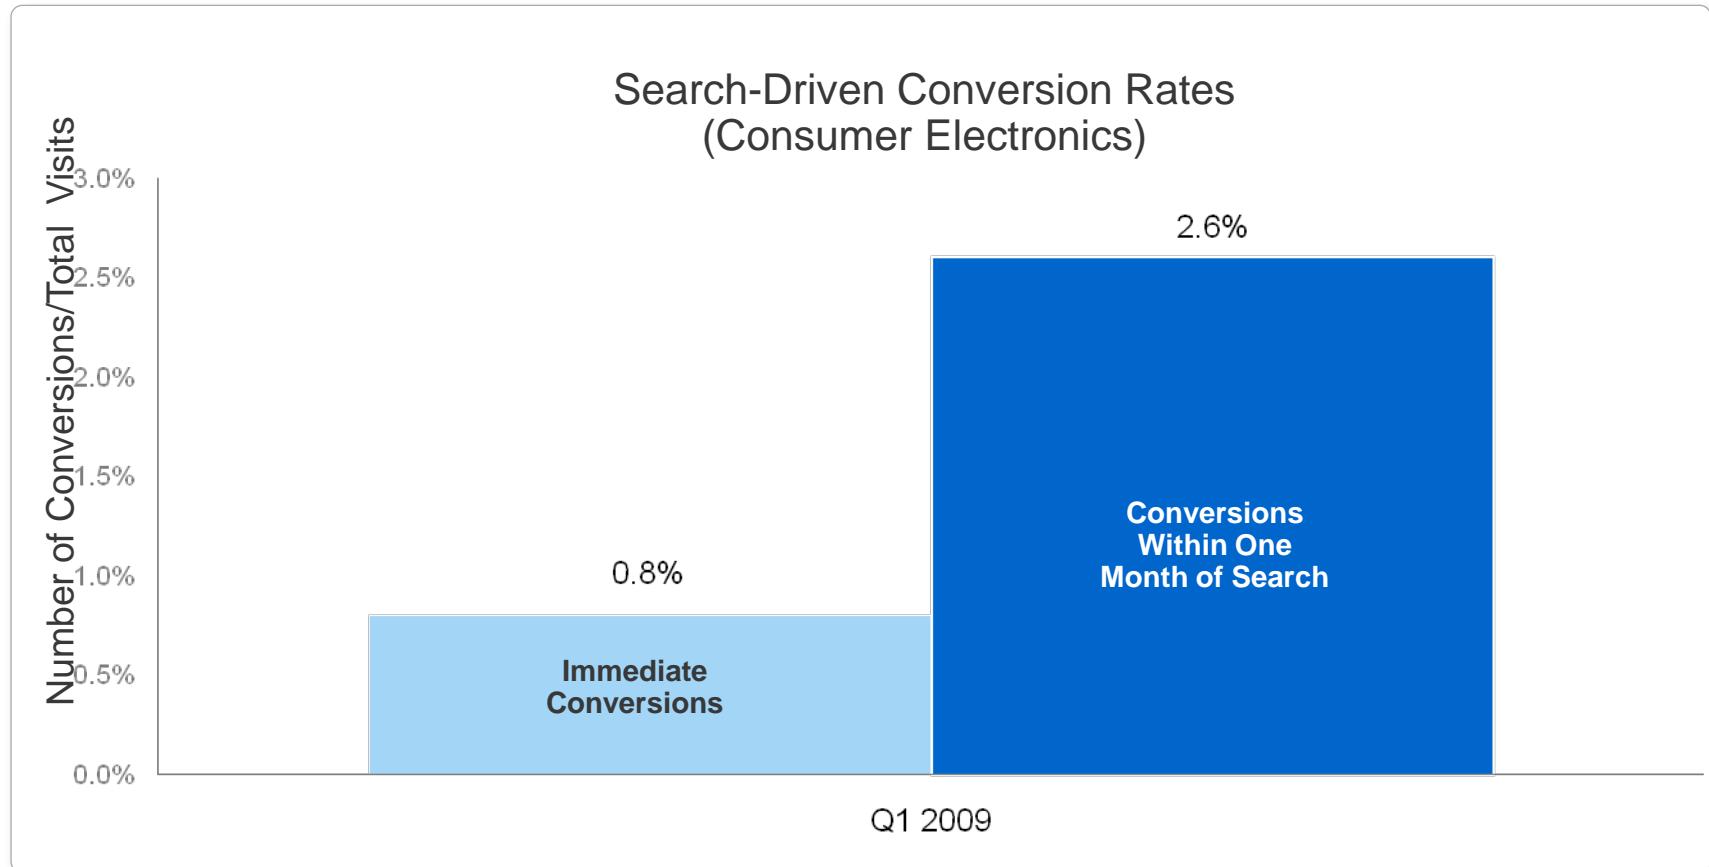

So It Takes Longer to Buy

Conversions occurring 3-4 weeks after the first search have increased **13%** since last year.

Measure Conversions Over 4 Weeks

Given extended research, searchers continue to convert over time.
