

Assign YouTube videos without distractions in your class

Enhance learning and keep your students engaged by assigning videos in Google Classroom using YouTube's Player for Education.

It keeps students focused by removing distractions—meaning it doesn't show ads, recommendations, or autoplay next videos.

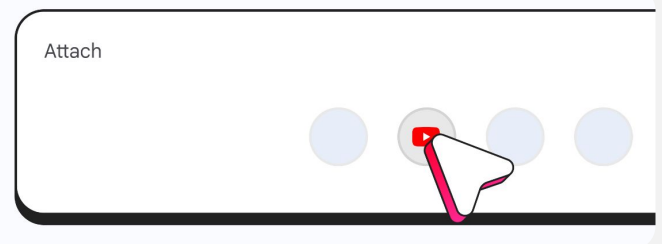

Step 1

Sign into your school Google Workspace for Education account and open Google Classroom.

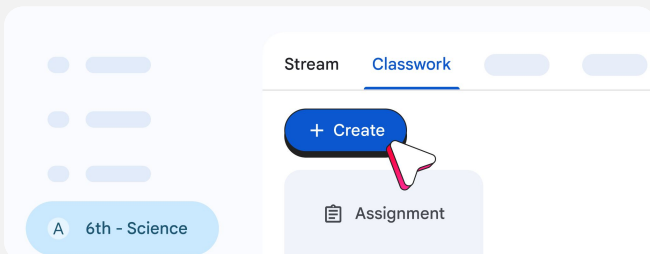

Step 4

Attach a video by clicking on the 'YouTube' icon.

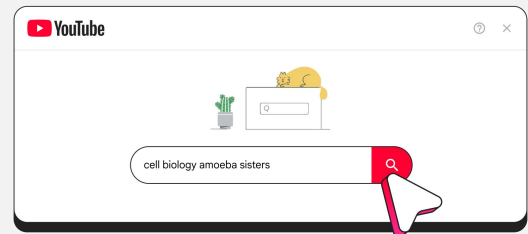

Step 2

Go to the 'Classwork' Tab, click the blue 'Create' button, then click 'Assignment'.

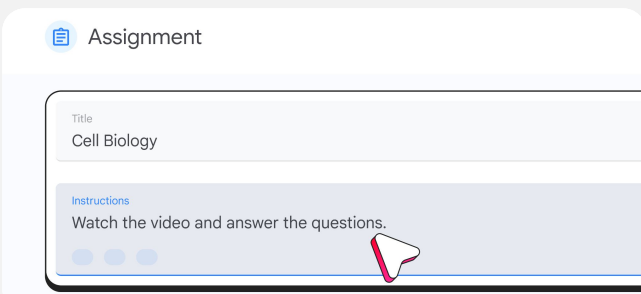

Step 5

A pop-up window will appear with a search bar. Use this to find the YouTube video you'd like to use for the assignment.

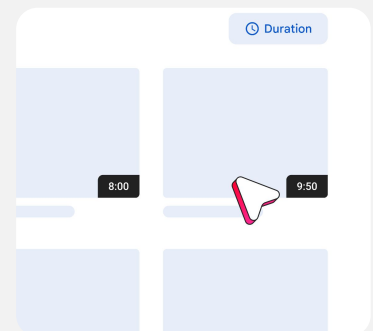

Step 3

Add a title and assignment instructions, such as "Watch the video and answer the questions."

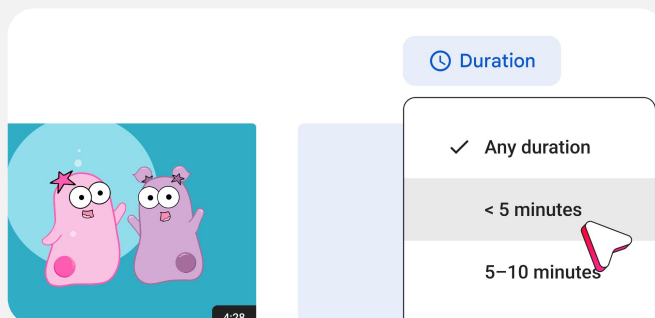

Step 6

Select your desired video from the search results for the assignment.

Step 7

Use the duration filter to find videos of a specific length to suit your lessons and keep students focused.

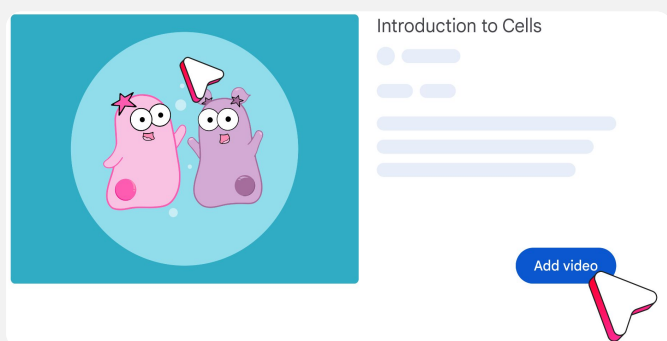

Step 10

Click the 'All students' button to assign to the entire class or specific students.

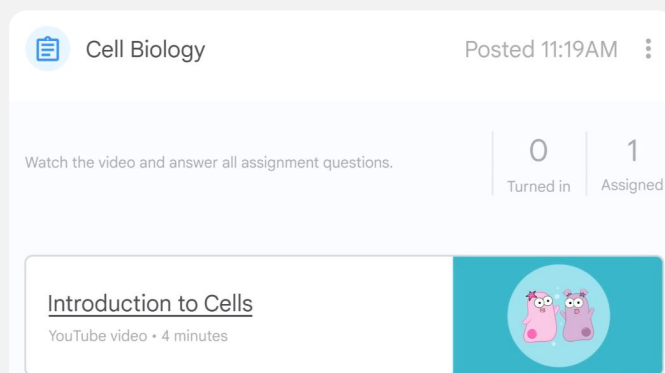

Step 8

When you've found the right video, attach the video by clicking 'Add Video'.

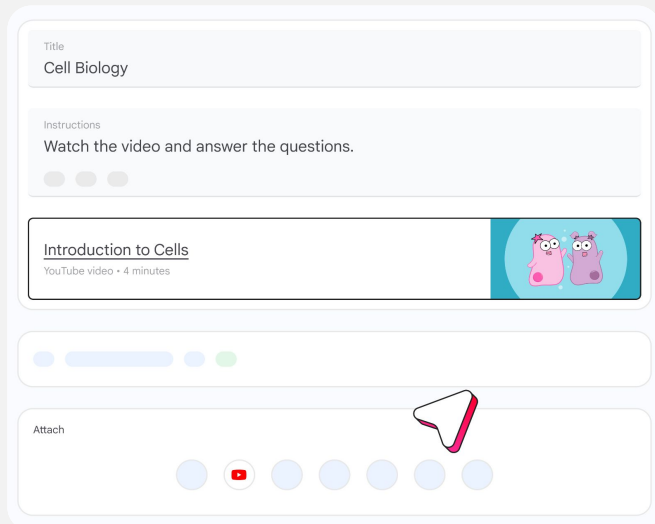

Step 11

Your students will now be able to view their assignment while logged into their Google Workspace for Education account.

Step 9

Review assignment details, such as the due dates and points for the assignment.

Did you know?

- ✓ YouTube will look a little different. Features like ads, auto-play, and recommendations are all removed. These in-built features help ensure a safer experience and keep your students focused.
- ✓ You can also embed interactive questions directly into the videos, creating an active learning experience for students. You'll need Workspace for Education Plus or Teaching and Learning Upgrade editions for this.
